Skills

Machine Learning
Data Visualization
Statistical Analysis
Data Mining
Critical Thinking
Communication
Teamwork
Hypothesis Testing
A/B Testing
Data Cleaning/Munging
Time Series Analysis
Web Scraping / API's

Software

R — Very Good
Python — Good
SQL — Good
Microsoft Suite — Very Good
Tableau — Good
Jupyter Notebook — Good
Git — Good
Spark — Basic
Shell — Average
JavaScript — Basic
React — Basic

Passionate and driven junior data scientist with a strong focus on leveraging data within a team to provide insights on business acumen. Skilled in statistical inference, machine learning, data visualization, and data mining using R, Python, and SQL. Advanced knowledge of statistical theory, and A/B testing. Between work and academia, offering 3 years of experience within data science. Outside of data science, enjoys the great outdoors, snowboarding, music, and discovering new places!

Experience

06/2019 - 10/2019

Data Scientist Intern - *Higher Logic, Portland, OR*

- Co-Developed new KPI which increased understanding of product usage across multiple business teams.
- In developing KPI, conducted exploratory analysis, and both time series and multivariate feature extraction.
- Communicated results to upper management and across departments, helping generate informed decision-making.
- Developed classification model for classifying users into various types according to engagement levels with the platform which improved understanding of user distribution and allowed for forecasting usage; translated benefits and costs of machine learning technology for non-technical audiences.
- Created clear and intriguing data visualizations, translating complex data sets into comprehensive visual representations.

01/2020 - 06/2020

Academic Researcher - *University of Oregon, Eugene, OR*

- Researched and implemented optimal classification machine-learning algorithm to predict student graduation likelihoods.
- Collaborated with both stakeholders and industry experts to ensure the project would meet key requirements.
- Machine learning algorithm achieved strong results, resulting in advisors being able to identify at-risk students at 89% accuracy.
- Co-authored research paper discussing findings, received an award for “Best Documented and Written Code”.

Education

09/2020 - Current

Masters of Science: Applied Economics

University of Oregon - Eugene, OR

- Current GPA: 4.03 / Expected Graduation June 2021
- Concentration in econometrics, causal inference, big data, machine learning, and time series forecasting.

09/2016 - 06/2020

Bachelor of Science: Applied Economics

University of Oregon - Eugene, OR

- Final GPA: 4.13 / Summa cum laude
- Minors in Computer Science and Business Administration.

Certifications

05/2020 **SQL For Data Science** - *Coursera*
04/2020 **Data Wrangling, Analysis and AB Testing with SQL** - *Coursera*

Technical Skills

Machine Learning: Regression (OLS, Logistic, Shrinkage), KNN, K-Means, Ensemble Methods, SVM, Neural Networks, ARIMA, VAR.

Coding Libraries: Tidymodels, Tidyverse, Dplyr, GGplot, SparklyR, data.table, Pandas, Numpy, Matplotlib, Seaborn, SKlearn, Scikit-learn.
